Key Macro is a small utility that helps you add a macro to the Windows keyboard, so you can perform a task with only one click. This program is basically designed for power users, so it is easy to use. To add a new macro, you need to first type the text that you want to be executed in the dedicated text field. When you press the OK button, the text appears in a highlighted text field. Moreover, you can add shortcut keys to existing macros and customize the function of the macro before storing it in the program. Help file and registration of macros:

You can find a help file in the installed folder. If you need, you can read it and learn how to add a macro to the keyboard. Additionally, you can create as many macros as you like. You can view the list of macros that are already saved in the program and you can create new ones by simply pressing the “Add New” button. After you are done with editing a macro, you can store it in the program by clicking the “Save” button.

KEYMACRO Review: Key Macro is a useful utility that can help you perform a task without having to press the shift or control keys. The program is designed to help you create shortcuts to various commands, so you can quickly execute a set of commands without using the mouse. This can be very helpful when you have a mouse in an environment where you do not have access to the mouse. For instance, you can create a macro that opens the system or a document with only one click, or a macro that executes various commands for a word

processor, such as print, save or a specific task. You can save the created macros in the program, so you can use them whenever you want. Another unique feature of this program is that you can store them in the program, so you can add a shortcut to any command without having to run the program each time. This program works on Windows systems.
