Simple layout You are welcomed by a clean and intuitive interface where most of the operations can be carried out with minimal effort. Everything is kept as simple and clear as possible, so there is no support for advanced parameters, just basic

functions. Basic functionality ckCover gives you the possibility to design a new CD cover by adding an image from your computer (JPG or BMP file format) that is used as a front picture and enter the text that appears on the back cover.

What's more, you can type in the text that represents the list with contents directly into the primary panel or paste it from other third-party utilities, as well as enter the text that appears on the left and right sides of the content list.
