Get your new boxer, bra and panties all in
one! The function of this costume is to protect
your skin from any possible trauma, in this
game. Purchase the bullet girls under clothes
set in just three pieces: bra, panties, and
boxer. Bullet girls are different from the
game's girl in the following ways. Just like the
girls in the game, there are three types of the
bullet girls, that is, the girl type, the nymph
type, and the zombie type. Each one can be
worn in a different way. The player gets to
choose one of the three types at the beginning
of the game, and then gets to wear the outfit
according to the type they chose. Bullet girls
are equipped with the same skills as the girls
of the game. Even in the bullet girl outfit,

there are a few parts that can be seen. The bra's back is covered in a white dotted design, and if you wish, you can find the bra's breastpiece as well. The panties have a white thong, with red dots on the back. In addition, if there is no outfit in your bag, you will also find a pair of black panties with white stripes on the back. Misc. The Crate

The Crate will hold all pets. You can free pets or randomize them in the Crate and transfer the pets in the cargo.

Cargo Ship

The Cargo Ship will handle pets & crates. If the pets have an available slot for it in the crate, it will release them. The Cargo Ship will hold pets, crates, and eggs. If there is no crate in the hanger, it will not freeze pets.

Freeze the Crate

This is the option to freeze/unfreeze the crates. Getting the crate into this status means it holds no items. If the crate is frozen, it can hold up to a max of 1 cargo that is made available. If the crate is unfrozen, it will hold a max of 3 crates.

Egg of the Serpent

This is the Egg of the Serpent, you get this in level 20. It helps you unlock Grim Mode.

Asif bhai Amjad Siddique Categories Amjad works for Banon, an IT company whose headquarters is in Dhaka. He tries to make a life for himself and his family in Banon. He is not taken seriously by his co-workers and superiors. One day he is hired for a project and Banon is about to get their very first project-management software. If it succeeds, it will make Amjad's boss proud. If it fails, Amjad will be sent packing to the remote Himamari Forest for 7 years. Banon's PM software is a project called "Cloud-Con." It has a lot of limitations but one of its features is called "Digital User Interaction." What it means is that you can use a chat program to tell your boss what to do. How? The software has a simple interface for the user to send a message to the BOSS. If the user sends a message from the Cloud-Con platform, the receiving end will call the Cloud-Con API to be able to find out where the message is going to. This is how Amjad can prove his point: he'll send messages from his phone to his boss, like "Amjad will send a message in 5 minutes".

This will be seen by the Cloud-Con, which will call up the API, and find out the message is going to Amjad's boss. Amjad and Banon will get their project.
