It also requires no.NET Framework version and it is free for

---

commercial use. The Dolphin fan base is starting to grow by leaps and bounds and not only does this demonstrate that a company can not only successfully produce an emulator, it also shows that the Dolphin crew can also make a kick ass user interface for it. Dolphin officially came on the scene on February 19, 2006 and is being developed by a team of dedicated and passionate individuals in Italy. It is currently in the alpha stage of development and has a tremendous amount of promise. From the screenshots and sample of what its creators have been able to achieve, it is clear that Dolphin is going to be an absolute blast to play on any system currently on the market today. I have had the opportunity to try it on a wide
