## **Features Key:**

### **The most diverse combat experience**

- A massive random encounter system that changes at each level
- A Vast World that harbors various kinds of scenery and enemies in a random manner. Encounter fierce monsters until you are finally able to join the ranks of the powerful Elden Lords. (Battle against monsters you've never seen before!);
- A variety of high-quality goods that vary even at each treasure site
- A combat system that forces you to make the decisions that define your future in an end-of-battle decision!

### **Adventures in which your thoughts coincide with the others**

- Many Adventurers have helped create the rich world of the Lands Between. You can communicate with them even if they are far from each other. For example, maybe you are planning on occupying Eilte, a huge and unclaimed region deep inside the Lands Between. You want to trade your newly acquired precious goods with her so you can immediately launch a warm siege. However, you only have the following information: a vague map, some information from villagers, and the name of the region.
- Having Eilte situate at a family of people who are willing to help you further enhances your exchange rate. In the end, you can combine the developments and plan more efficiently. Your efforts will get more effective thanks to the support of others.
- As the Adventurers express various points of view, they will sometimes propose ideas or scenarios that are missing from the game. It's like getting additional story information.
- You will quickly find out that your thoughts match theirs as you exchange information and ideas. You can easily understand the world and develop your character at the same pace while advancing through the story together.
