Free-to-play games are big business, but they have traditionally been a challenge to monetize. All those zombies and dream cats can keep you busy, but you're only paying to play, not to unlock, which limits your earnings. A major part of the business of gaming has shifted from paying for power-ups and time-fillers to spend and spend until you hit the gates of infinity. Back in 2012, Rock, Paper, Shotgun looked at the metrics of free-to-play games and came to a stark realization, all the players don't need to pay. There are a few core facts to keep in mind. "Right now, a half-million active accounts consume as much data as the entire broadband population of the United States." Here's the kicker
