“We decided to approach this problem of handling data and the transition from player to player and on-ball action with a different approach,” said Raphael Domènech, General Manager of the Sports Division at SEGA Europe. “Instead of trying to be realistic with the data, we decided to use as much captured data as possible to make a game that feels more natural, easier to play and is closer to the real world. Our main goal was to make sure the gameplay felt fluid to make it easier for people to adapt to, and our gameplay systems that drive the ball have all been tuned and balanced around this new technology.” In terms of the flow and fluidity of the game, the developers have increased the focus on player skill. Players learn and adapt to their opponents based on how they move and play to improve the timing and control of their attacks and defending. FIFA 22 uses a learning system where the player uses their skills to improve the way they play while the game adapts to the player’s skill and style. Bend It Like Beckham “We needed to go out of our way to make sure every single facet of the player, from animation to how they play, responds appropriately in terms of the way they move,” said Raphael. “We have incorporated motion capture data into the game, and we have also found a way of bringing artificial intelligence and emotions into the game. While the players are getting stronger, we are creating the system to make them easier to play with and also tougher to play against. We are constantly tuning the gameplay so players will be able to adapt to situations and change how they play. This also means the game is easier to play and allows for more fluid gameplay.” Reality Capture Going “beyond realistic physics,” FIFA 22 also utilizes “Reality Capture,” a motion capture system that captures the way the players move in real life. The goal was to capture more motion capture data and create a system that produced more realistic gameplay. Using Reality Capture, the developers were able to record full-body movement, from head to toe, at a high level of detail, and at the same time, capture accurate data for use in the gameplay. “We can capture an accurate representation of the way players move in a variety of positions and set-ups,” said Raphael. “The Motion Engine is a key component of

The best of the best - Whichever mode you choose, you can make your ultimate dream team and experience the thrill of the hunt every time you take the pitch. Put together your favourite FUT Champions like Gonzalo Higuain, Eden Hazard and Wayne Rooney on your squad and embark on a quest to become the greatest manager/player on the planet. Team Battles - Team up with up to three of your friends and battle it out on the pitches of the world, take on rival managers, and progress through the various Team Battle modes to earn a range of trophies and rewards to build and improve your Ultimate Team - all while you compete in memorable tournament-style matches. FIFA Ultimate Team Ultimate - FIFA Ultimate Team Ultimate (FUT Ultimate) adds two new items to the ever-growing FIFA Ultimate Team experience: Players and Stretching Players. Players can be unlocked as duplicates of existing players in your Ultimate Team by spending real money or diamonds on them. If there is a player in your Ultimate Team who is the best of their position in FIFA Ultimate Team, including xG on them (based on most recent statistics), and they are available in the market for a low-cost, you can put them on your FUT team using diamonds. There is a slight risk that the player you've spent diamonds on isn't as good as your best player in FIFA, but because the player is already on your team, they will automatically be flagged as a free transfer, which grants a portion of your Diamonds back to your account when they are subsequently sold. Players such as Harry Kane, James Rodriguez, Antoine Griezmann and Adrien Rabiot were all bought as part of FUT Ultimate. FIFA Ultimate Team Manager - FIFA Ultimate Team Manager (FUTM) is a touch-based guide designed to teach your friends and family the fundamentals of managing a football team. Play with your pals as you master 4-on-4 football, and make new friends along the way. FUTM runs on all major platforms: iPhone, iPad, and Apple TV, as well as Android, Amazon Fire, Windows Phone and Windows 10 PCs and tablets. UEFA Champions League Expansion - With more than 35 official UEFA Champions League teams to choose from, FIFA 20 is bigger and better than ever. Play as your favourite team in real-world championships, or rise through the ranks by doing your country proud in prestigious World Cup qualifiers. Featuring over

FIFA is the world's best-selling soccer video game franchise, with millions of fans in over 100 countries around the globe. FIFA brings the authentic football experience with the new Player Impact Engine (PIE), which recreates the speed and emotion of top European leagues, while creating a more physical feel and allowing for more shots on goal, dribbling, and stronger shots. In addition, the game features the new New Player Motion Engine, which adds more fluidity and a higher level of realism to the most popular worldwide sport. There are two ways to play in FIFA. Traditional: play head-to-head matches against other players or teams to win the league, while taking tactical challenges such as defense, counter-attack, aerial duels, and more. Competitive: practice and test your skills against realistic AI opponents in exhibition matches. FIFA 22 packs in a year's worth of gameplay additions and innovations: New Player Motion (NPM) Engine: the new NPM Engine makes your players run faster, slide better, kick harder, jump higher, and receive the ball better. The energy-assisted NPM Engine gets you up to speed faster and smoother. Attacking Intelligence (A.I.) Accomplishments: help your A.I. opponent by either passing or shooting with less risk and more effectiveness.
