In A.D. 2007, Zimbabwe had its first contested democratic election in 47 years, and its first multiparty system in more than a century. Millions of Zimbabweans—among them, a thoughtful and shrewd statesman—took part in the elections in June of that year. This was nothing less than a brave step toward a new, more democratic, and more responsible government. Yet, it was, and remains, only the first step.Q: Need to write a Android app that can communicate with a Raspberry Pi over internet I am trying to figure out how to write an app that can communicate with a Raspberry Pi over the internet. My thoughts are to create a website, that can send data to a servlet hosted on a raspberry pi. I am having trouble thinking of how to do it, I am trying to avoid an app only to send and receive. A: Android does not natively connect to a web server. Android apps do not run "in" the browser. They run on a local server. So you cannot create a web site and have it respond to Android. Your only option is an app. It can use HTML to do what you want. Can the world's smallest endangered species survive? Seven million years ago, Australia's crocodyliforms had a run-in with an invading group of dinosaurs. The reptiles were clobbered and, to make things worse, they were the size of a large iguana. Today, the world's smallest venomous land snake has nearly become extinct, with fewer than 10,000 of them surviving in a fragment of Australia's Uluru-Kata Tjuar National Park. Still, a group of scientists has identified the first evidence that some populations have survived the mass extinction event and are still reproducing. The Australian Museum, where the world's smallest lizards were first discovered in 2004, is working with the University of New South Wales in Australia to prevent the species from going extinct. "We've always known that they're critically endangered d0c515b9f4
