Q: Linq and gridview column data asp.net I am working on an ASP.net application in which i need a grid view but its column data is from a table called "Word" in that the column "Words" has a foreign key to another table called "Resource" and that table has columns like "Word" and "Resource". I need the foreign key column called "Id" to be in a drop down list of strings in the word column in my grid view but i am not getting any code to write for this. Can anyone help? A: You can have a dataservice class which returns the words based on some filter/keyword. Here's the basic idea. Then in your gridview: "DataValueField="Word" Enabled="Word" Enabled="Word"

## QuizMaker [2022-Latest]

Create quizzes of any type on your Android device and send your final results to Google Classroom, Instapaper, etc. + Question types: Short answer, Multiple choice, Essay, or Fill in the Blanks + Prompt for the answers & option for autocomplete + Optional answer preview or canned responses + Backup and restore + Export to PDF + Compressed ZIP file + Auto-number questions in the answers section + Support both English and Chinese languages + Add multiple questions to a test, make tests of any size + Multiple choice based on the ANVIL SDK + Create custom question sets with supports for multiple answers and practice + Preview all questions on screen + Save quiz history + Export exam result to both HTML and PDF + Successful data backup via Google Classroom, Instapaper, Readability, etc + Add picture to the questions + Number of questions + Multiple questions for each test + Set question of answer type as required for each question + Add bullet point to hint the correct answer + Manual and auto grading + Practice question and game question + Create sample data in CSV file + Press back button to undo the grade This application lets you can set a multiple exams including a "Practice" question store at set of multiple-choice questions. With these, you can practice all questions and generate a special score for the answers. If the result is not enough, you can set a penaly for increate anset from the grading question. Each question allo guestions according to the field and the auto-populate function can be configured in the settings. This application also lets you control users' access to the data. Users can be given a different set of permissions according to their roles. When they enter a quiz, they will be able to see all their questions and answers. After a quiz has been submitted, users can also edit and change their data. In some cases, users may not have the permission to modify their own data. In this case, the application will create an audit log automatically. This is a useful application to share quiz data. No

### What's New In QuizMaker?

Create XML format tests using an intuitive layout that emphasizes the quiz-question type relationship The application will allow you to first create one or several quizzes, and then assign questions to each one. The provided interface carries a well-thought layout, which holds the tests on one side, and their corresponding answers in the other. At this point it is worth mentioning that the application also offers batch processing, which can come in handy especially to those who wish to create multiple tests in a timely and efficient manner. Select one of the multiple question types, add answers, grades, penalties and even individual feedback for each answer By far, the highlight of the app is the way it deploys its question types, as well as the available customization. One can choose a pre-defined question type, assign it to a particular test, name it, add its corresponding test, as well as answers and automatic numbering is included as well. Last but not least, previewing of the resulting tests can be done either in plain text, HTML, or even "blackboard" formats. Purpose-fit quiz creator that offers in-depth customization of questions, answers, and grading If you're looking for a simple yet capable app for creating quizzes, which also offers deep tweaking for the question type, assign it to a particular test, name it, add its corresponding test, as well as answers, the negative tests on one side, and their corresponding test, as well as answers and automatic numbering is included as well. Last but not least, previewing of the resulting tests can be done either in plain text, HTML, or even "blackboard" formats. Purpose-fit quiz creator that offers in-depth customization of questions, answers, and grading If you're looking for a simple yet capable app for creating quizzes, which also offers deep tweaking for the question type, assign it to a particular test, name it, add its corresponding test, as well as answers and scoring or grades. Furthermore, penalties are also provided, for incorrect answers and automati
