Anyone who has ever suffered from buyer's remorse is all too familiar with the "buy only what you can afford" mindset. MUSIC from this game: One of the most arduous and sensitive issues in modern life involves society's clash against corporate interests, the privatization of public spaces, escalating consumer debt, and a growing fear of plunging into the future. Has technology brought us together, or has it displaced and isolated us? What are our future prospects, now that life's basic goods have become commodities, marketable on the stock exchange? What are the likely outcomes of the cyber-storm that is rapidly approaching? Are there no alternatives to the market society, or will new rules and new narratives emerge to guide our time? This documentary explores these questions, by following one of the most exciting, yet confusing movements in contemporary culture - the recent emergence of FreeSoftware and OpenSource movements, in which computer users can share and revise codes of programs (OS & FOSS). FREE SOFTWARE & OPEN SOURCE | A NewDevelopmental Paradigm A new developmental paradigm that can enable better sharing of goods, production of higher value-added products, and an alternative system of funding development of software is pushing forward. This documentary goes beyond traditional open-source and free-software definitions and shows how these movements are impacting those at the grassroots in the developing world, promoting stronger communities living in harmony and balance. HISTORY OF OPEN SOURCE AND FREE SOFTWARE Here in the StartUpBar, we show you examples of open source software, stories of free software, interactive sessions with the founders and developers of open source products, and exhibit awards promoting the use of open source software in educational institutions, charitable and non-profit organization. VOICES OF OPEN SOURCE AND FREE SOFTWARE Those most affected and inspired by this new movement are the ones who explain how the digital landscape is becoming more open. We meet and interview a myriad of users who are now able to transform their ideas and creative work into actions. DEVELOPING COUNTRIES This documentary goes beyond the traditional open-source and free-software movements, seeking to prove that a new paradigm is rapidly becoming a major force in the developing world, changing so rapidly that it is bff6bb2d33
