Plenty of gameplay affects players, such as different strategies for jet-packing and gravity controls in the air, and flying slowly over the battlefield rather than careening along. Of course, most of the beneficial features of the game are left just one step short of the original due to time constraints. Even if you owned every version of Gordon Freeman, someone still needed to boost this game's multiplayer capabilities. With its additions, Nomad is still the best version of Stalker so far. Stalker 3 also improves the first two games, bringing in new locations and more weapons and alien AI. There was enough room in the budget to allow Stalker 3 a full arsenal of attack, cover, and attachment settings, unlike previous Stalker titles that only got a title screen option. A side-scrolling strategy mode is also added, giving the game a full story with a finite number of places, people, items, and missions to master. Stalker 3's greatest asset, though, is the recreation of the zone map. The original game location feature uses a mode tile, but Stalker 3 went straight for detailed, high resolution hex maps, including height information. This level of geography fits inside the game's 45 degree angle, showing the

Theresa May's defence secretary has described the charge of the light brigade by UKIP as "common ground for a good debate in the UK". Michael Fallon said the row over Parliament's decision to back Theresa May's call for a referendum on Britain's membership of the European Union was a "a good British debate" and spoke of the need for "responsibility, stability and security" with Europe. His comments come after it was reported that former defence minister Liam Fox had admitted in a meeting with businesses that he would urge the Prime Minister not to invoke Article 50 of the Lisbon Treaty. Speaking to reporters at an international security conference in Brunei, Mr Fallon called for open debate and less political posturing from all sides. He said: "I think, on Brexit, it's very important we talk about it in all its variety and to that end I know Liam is doing a speech tomorrow. "We want to have a good debate with people on all sides. I don't think that every time we turn around there is some new ideological idea of how the world should be and I think that's quite unhelpful."
