Once you have the files, you can then go into your games folder and locate the Oats Studios.bin file for Zygote. From there you can double-click on the.bin file to install the files you extracted from the 3D Content folder to your game's.bin folder. However, before you do all this, you'll want to extract the Zygote - MacOS package, as it contains a "Synthetic Skulls for Print" folder with the shader sets that you'll need to install to your game. Guide DR3GRVNGUE BY GSoEth Seeker Chosen Level 65 Class Slayer Class Survivor Race Artifact Boss Slayer Tips Level: 65 Str: 105 Con: 65 Int: 100 Dex: 85 Luk: 65 Cha: 78 Str: 5000 Mana: 100 Overview Seeker First off, this is Seeker. He's a melee version of the ranged deathlord. He shares his base stats with a normal ranged deathlord, with two exceptions: two extra melee damage and a base attack speed of 95%. Seekers achieve most of their damage from slams, often with the help of their powerful 75% AoE stun. As said before, Seekers have a value melee counterpart because we are going to sacrifice our ability to deal damage over range, but we'll use our melee to do decent damage to multiple enemies simultaneously. One of the unique features that makes this recommended, is our ability to re-position ourselves very easily. This comes in handy when we want to heal one of our melee characters, for example, or when we want to run away from combat. Because we are melee, we do most of our healing through heals that we can easily trigger through abilities. Recommended Rewards Armor Bows Revolver Now that we know who we are, it's time to talk about requirements for this Slayer and Survivor build. Both classes have the ability to desecrate earth while on the battlefield, and for both Slayer and Survivor, this will enhance their stats. The only difference is that the Slayer can fuel its desecration with souls collected from carcasses, while a Soulbind of the Bloodbound Prophecy can do this for the Survivor. Now, you can trade in your souls for death shrouds, which are used to increase your stats. However, if you are using the Bloodbound Prophecy, you are going to have to brew death shrouds every time you need to replenish the buff, which means killing things. There are three statues that will, for now, give artifacts that don't require relics. The other artifact is Spawner, but you will need to break all three of the aforementioned objects to get it, and it only yields three shards. Of the two quest rewards that are not artifacts, it's a
