SMTPing Keygen For (LifeTime)

SMTPing is a tool for troubleshooting a SMTP server on a network. The software can be used for repairing a working SMTP server or for checking a failing one. SMTPing has a web interface where you can enter the IP addresses of the nodes and then click on the "Starting Test" button. The software will check all nodes and send them one by one a message with a predefined subject and body. A small notelink will be posted with the reply status of the message at the moment of sending it. SMTPing Features: Send unlimited number of test messages for any number of group nodes FTP/SNMP management Automatic and manual repair Possibility of configuring the IP addresses of the nodes from the keyboard Optionally, you can enter the required data by hand Large set of image formats supported Thoughtfully designed UI with automatic resizing Supports large web sites; page orientation Automatic cleaning of the database after scan Service speed meter with current and maximum speed for all nodes The table is automatically filled with new data if the node is restarted by the system Optionally, you can fill the database from a shared memory file Optionally, you can save the database to a file Optionally, you can save history of the scanned data to a file Optionally, the database can be compressed and saved to a file Optionally, you can switch on automatic backup of the database and save it to a file SMTPing Open Source License: The SMTPing project is licensed under the GPL 3.0 open source license, see the SMTPing license page for more info. SMTPing Source Code: SMTPing source code can be downloaded from the website: smtping.sourceforge.net To build the source code: 1. Install qmake from qt3-qt4-msvc2010-64bit-4.8.2\buildtools\qmake.exe. 2. Download the source code from the website: smtping.sourceforge.net 3. Extract the tar archive and run the qmake.exe file. 4. Run the make.bat file. 5. To run the program with the debugging information, run the gdb.bat file. 6. The program can be run also in the turbo debugging mode. Run the tdb.bat file. Notes: In the case you get

SMTPing Crack+ Free Registration Code Download For Windows (Updated 2022)
