Then you should change the paths for all these Jars, because your program should search the C:\Users\b2bzz\Downloads\shringar\Shringar\shringar\bin\Artifact.jar After you have changed them, you have to change the path, which is used to find the external libraries, which is typically: C:\Users\b2bzz\Downloads\shringar\Shringar\lib\runtime.jar According to you screenshot we can deduce, that the program creates temporary files like this: C:\Users\b2bzz\AppData\Local\Temp__arj.tmp Check this after you changed the paths to the Jars. The File Mode should be executable as well as the Sender. You can enable the log and have a look at the output. Q: How to add a column in pandas DataFrame with the type of a column of the df I am new to pandas. I have dataframe as below I want to add a column which would start from 'B' and column type as DF.How can I add this column and I want this column to be the data frame df. A: Use swaplevel parameter for reordering columns by index: df.columns = df.columns.swaplevel(0,1) df[['B']] = df[['C']] print (df) A B C 0 23 A 3 1 45 D 4 2 25 B 5 0 0 The Pizza Works launched in 2016. It was a yearly event. The pizza was the same, and the person who paid in cash always got a headstart on the crowds. This year, the event will be different. The Pizza Works has joined forces with Addy, the local bakery that's frequented by diners in the area. They're bringing in guest chefs to whip up the pizza and food, and the mix is always a hit. Our food reporter, Tim Fong, was at this year's event and got a taste. After, he sampled the foods with other food writers. Want a secret piece of pizza from this year's event? Scroll down to see it! The pizza is
