Furry Feet is a cute puzzle game with a twist - a girl with amazing furry feet is running on a city street trying to find her home. The city is overcrowded and every street is the same. However, it is possible to solve each puzzle in a different way, as the girl can only move in the city in one way: across the street. Players must connect the dots of the girl and follow the arrow tiles to move her forward, or move the direction she is walking in to move her. The puzzle will always remain same, but will be solved in a different way. Furry Feet has a wide variety of levels, from 1-5 unique ways to solve each level. This means you can try solving the level a hundred times and still find a different way each time. There is a tutorial in-game to help you get started. There is also an in-game level editor for you to create your own levels and submit them to the game. Furry Feet was created by Toucan Studio, a small and independent games studio. The game is free to download. **** DISCLAIMER **** This game has challenging puzzles.
