Here's the links: We had decided to do something special during the Halloween weekend, and while most of it was laughably bad, we managed to stick with it and finished the map to a comletely playable state! Grab some candy from the feilds or smashpot and join us for a scary and fun experience! Hello, Welcome to a preview of the map titled "The one that scared me" A short story A couple of years ago, whilst I was browsing the internet for a horror theme for a map i was planning on making, I saw a website for the chiller film "The one that scared me". The website showed an interactive version of the story for users to go through aswell as a map in which the player could go in and basically play the part of a character in the film. So I thought, "why don't I make a game based on the website". I therefore made this game based off of the website. Feel free to download the map and try it out! It's basically a free version of the map! Hope you like it! This is a trailer for the upcoming Halloween themed map:Achievement 3. Achievement 3 Trailer The goal of this project is to be the best achievement map I could make. I have been thinking about making an achievement map from the very beginning, but it never happened. Recently I decided I would really try to work on it, and I am very happy with the result of that decision. Now that Halloween is almost here, I decided to make the best map out of my skill so far. My goal for this project is to have the best achievement map I could make using the tools given to me. That being said, we won't be able to make everything we want in this project, but at least we will try. I have chosen to make an Halloween themed map

Set in the far future, the galaxy is at war. Trillions of slaves to a dystopian game master are enslaved by superhuman ai and forced to fight each other until only one person is left standing. This war has been raging on for over 50 years, and the balance has been finally redressed... slowly. The computer systems that run the game have been hacked and turned against the gamer... but he will be able to fight back. Robots, lasers, spaceships... you are good at fighting you're not good at fighting robots. Advertisement Legacy of War Legacy of War is an open-world single player online sci-fi strategy video game for Android. Free to play and developed by the experienced games developers, Big Bravo Games, Legacy of War is a game of complete strategy, with an enormous single-player campaign and player versus player combat. Using a rich gameplay system the player can strategically develop his forces and drive his enemies from their strategic strongholds and capture their cities. Legacy of War has 3 different territories that can be passed from player to player during the course of the game. The following territories are: - Azazel - Ithys - Poseidon Some of the main territories are controlled by the Archon Empire. Losing control of any territory in the game causes your player character to lose a level. To create realistic gameplay, each territory has its own set of buildings. This includes resource stores that can be used to upgrade every weapon, ability and building. Another important feature that improves gameplay is that every

player gains experience and levels over the course of the single player campaign. The amount of experience you gain per battle is directly related to the duration of the battle. The further you go in a single player campaign the more experience you gain and the more powerful your player becomes. Final Fantasy Tactics Advance Final Fantasy Tactics Advance is a turn-based tactical RPG which was also released for the PlayStation Portable on the Japan only release of the game. The game features both an extensive single player campaign and a multiplayer option. Final Fantasy Tactics Advance includes the original Final Fantasy Tactics and Final Fantasy Tactics: The War of the Lions. Xenogears Xenogears, also known as The Next Messiah, is an action role-playing game developed by Square and released for the Sony PlayStation in 1998. The soundtrack was composed by Nobuo Uematsu. "Rome Undiscovered" is an indie game. The aim of the game is to complete each level without using the same resources more than once. It is a game of skill, strategy and cunning. To be able to complete a level, you have to be aware of what's on the board, where to collect items and most importantly, which paths are more interesting and safe than others. To start a new level, you have to launch the level editor, where you will be able to see all the items and plot new levels with the help of the storyline. Do you remember "Halo" or "GTA" where you were in an open world and can do anything and everything? You can find many levels and achievements in "Rome Undiscovered". You'll have to be clever to use every item at its best. Make sense of colors, place and shapes. Collect all resources and visit all cities. You'll also have to avoid enemies and find hidden treasures! Show More... What's New - Added a new graphics engine for game to give you more images of Rome. - Added an option to remove borders and Google ads. - Corrected and improved color scheme for colors and clouds. - Several other general fixes and improvements.var os = require("os"); var fs = require("fs"); var _0x27713 = __webpack_require__(0x3d5af2); var log =
