Roblox is a free online game platform, created in 2004, that allows users to create their own games and play those games with others at no cost. Creating your own game is straightforward, and is similar to creating a video game using tools such as Game Maker, except that Roblox is geared towards younger users, and allows users to incorporate elements of programming and 3D modeling. With several monthly building updates, Roblox includes dozens of toolsets that allow users to create immersive 3D buildings and games. Roblox also has a fast-paced and collaborative multiplayer game platform that allows users to play games created by other players or with other players. Similar to programs such as Candy Crush, Roblox features a robust progression system that allows players to purchase game upgrades with Robux, the game's virtual currency. Robux can be earned by playing Roblox's games or by watching advertisements, or is purchased with real world money through Roblox's website. Roblox has been downloaded more than 100 million times and is available for both desktop and mobile platforms. In 2018, Roblox was recognized as one of the best free platforms to create games for kids and was awarded the Best Educational Games and Best All-Round Games at the GDC Kids Awards. Gameplay Roblox is a sandbox-style game with various gameplay elements. Unlike traditional video games, Roblox allows users to create "worlds" or "generations," which contain game-related items. These worlds are edited in a 3D modelling tool called the "Roblox Studio", and players can create their own gameplay elements such as walls, floors, doors, and windows, as well as game assets such as furniture, games, pets, and weather effects. Roblox provides an interface to program in Lua, a scripting language, and to define and control gameplay elements, and players can also use the program's "Blocks" to create and alter existing elements in the world. Players can place the player characters they create on or inside 3D models of their own. Unlike video games such as Minecraft, Roblox does not have predefined rooms and layouts. Therefore, users can create their own "rooms" inside buildings. These rooms are used to designate specific gameplay spaces and can be placed anywhere in the room and rotated, scaled, and moved. The building editor contains a basic level editor, allowing users to create layouts and user interface elements for their games. Robl

I'm the type of person that can't just sit and watch. So I made a whole series of videos about Roblox. So make sure that you watch them and maybe get an idea of what you like about that game. Then I made the video about some characters and the cheats. And here we are with the cheat for robux. So this Roblox cheat code makes you earn a lot of free robux in this game. So I want you to make sure that you enter your robux account. And then you can buy what you want in this game. So you just click on one of the characters. And if you pay with coins, it doesn't matter if it's a dollar or 10 dollars. You'll earn free robux that way. For example, I earn free robux every day. And they are being a bit too generous right now. Because I can spend them on different things in this game. And they are giving me free robux without me having to spend anything. That's fine! But be careful when you are trying to level up. Because you can't really do that without spending money. Because you need materials to build and upgrade buildings. Also you can't really just level up your character. So I want to upgrade everything like my room, my buildings. That means that you need to invest money. I can't just walk around and level up. Also I need to train, so
