Tumatwala, Kalbeliya.Q: app.post redirect to app.get instead of update I am going crazy over something that I cannot figure out. When I click on a div that corresponds to a form, I want the POST to redirect to a GET, so that the server can process the data and return results to the div that clicked it. My issue is that the POST is actually executing the GET. Here is my javascript: `$('.myForm').on("submit", function(event) { event.preventDefault(); $('#result').load(location.href); })`
