Gorilla Glue Gorilla Glue is a brand of epoxy adhesive that is used for a variety of purposes. Its brand name and logo were created by Krazy Glue and is owned by 3M. Contents Overview Gorilla Glue is a brand of epoxy adhesive that is used for an assortment of purposes. Its brand name and logo were created by the 3M Corporation and is owned by the 3M Company. The product has been manufactured by the 3M Corporation since 1955, although it was originally created by the Krazy Glue Company. Gorilla Glue was originally developed for adhering items together, such as wood and clay. The adhesive can also be used as a wood glue, in metal working, and as a jointing or filling agent for cement. The product can be used for a number of other purposes as well. Gorilla Glue is water-based and is available in a selection of formulations. History Gorilla Glue was originally developed by Werner Cooperman for the purpose of adhering items together. It was later developed by Krazy Glue and the product was initially marketed as the Krazy Glue. Krazy Glue became a brand name and went on to become a famous brand. Krazy Glue has remained a strong brand name, despite losing the original Krazy Glue Company. The brand has experienced a decline in sales. The product has now been sold by the 3M Corporation for almost 50 years. It has remained popular throughout its history. Gorilla Glue is available in a wide variety of formulations. The adhesive is manufactured in several locations, although it is mostly manufactured in the US. The product is sold in many markets, including China, the United States, and Japan. The product has experienced a strong increase in sales, which has been explained by the increase in the number of people moving to and living in cities. Variants There are several different variants of Gorilla Glue. Some are more commonly used for different purposes. Some variants of the product include: Gorilla Glue FX: This type of glue has a more flexible consistency and is designed for use in jewelry and
